

The MAGI Study Connection

Five-Minute Speed Dating with Sponsors, CROs & Site Networks Open to Research Sites and Site Networks Only

S Sponsor and **C** CRO Profiles

S **Acadia Pharmaceuticals** is a biopharmaceutical company dedicated to developing and commercializing innovative medicines that will improve the lives of patients with central nervous system (CNS) disorders.

C **Advanced Clinical** is a full-service clinical development organization committed to improving all lives touched by clinical research. We understand the complex nature of the industry and approach each opportunity to support clinical research with compassion.

C **Cato Research** is an international regulatory and clinical contract research organization (CRO) that has been delivering successful outcomes for its clients for more than 27 years. Through highly qualified and experienced personnel and strategic alliances with selected regional CROs, CATO offers tried-and-trusted international coverage.

S **Centrexion Therapeutics** is advancing one of the largest, exclusively pain-focused pipelines of novel, non-opioid therapies in active development to bridge the safety and efficacy gaps in current chronic pain treatment. We aim to ease the burden that moderate to severe chronic pain places on patients and our healthcare system.

C **Covance** is a global contract research organization and has worked on all of the top 50 best-selling drugs available today through its full spectrum of nonclinical, clinical and commercialization services.

S **GlaxoSmithKline** is a science-led global healthcare company with a special purpose: to help people do more, feel better, and live longer. Our goal is to be one of the world's most innovative, best performing and trusted healthcare companies.

C **Health Decisions** is a full-service CRO providing extensive clinical development expertise and comprehensive services for bringing women's health and diagnostics to market rapidly, efficiently and with minimal risk.

C **IQVIA** is committed to bringing clients the best in creative problem solving, enabling healthcare companies to innovate with confidence, maximize opportunities, and ultimately drive human health forward.

S **Janssen Pharmaceuticals**, a leading pharmaceutical company in the United States, focuses its innovation on some of the most devastating diseases and the most complex medical challenges of our time, across five therapeutic areas: Cardiovascular & Metabolism, Immunology, Infectious Diseases & Vaccines, Neuroscience and Oncology.

S **Nestle** focuses on products with nutrition, health and wellness benefits. This includes delivering products with simpler ingredients, as well as more premium, organic, natural and fortified foods and beverages. Nestlé also offers a range of affordably-priced, high-quality, nutritious products.

C **Novella Clinical** is a full-service CRO, focused on advancing clinical trials and improving lives with global capabilities, individualized attention, and a collaborative approach

C **PAREXEL International** is a leading global biopharmaceutical services company, providing a broad range of expertise-based clinical research, consulting, medical communications, and technology solutions and services. PAREXEL has developed significant expertise, from drug development and regulatory consulting to clinical pharmacology, clinical trials management, and reimbursement.

C **PRA Health Sciences** is one of the world's leading global contract research organizations, providing outsourced clinical development services to the biotechnology and pharmaceutical industries. PRA's global clinical development platform includes more than 70 offices and over 14,000 employees worldwide. Since 2000, PRA has participated in approximately 3,500 clinical trials worldwide.

C **PSI** is the global clinical research organization ranked No. 1 by investigators twice in a row. PSI conducts research in oncology, hematology, infectious diseases, GI, multiple sclerosis, and rare diseases. In 2018, PSI CRO was named as a CRO Leader by sponsors, in compatibility, expertise, reliability and quality by the ISR CRO Leadership Awards.

S **SynCardia Systems** continues to refine the SynCardia Total Artificial Heart (TAH), a clinically proven life-saving treatment option for cardiac transplant-eligible patients at risk of imminent death from biventricular failure.

C **Syneos Health**, the coming together of INC Research and inVentiv Health as one global company, has created the industry's only true end-to-end solution. This one entity combines world-renowned clinical research and commercialization capabilities with today's most advanced science, business and data technologies to make real advances possible.

C **Worldwide Clinical Trials** was founded by physicians dedicated to advancing medical science and built on an unwavering commitment to operational excellence. We work primarily in the areas of CNS, cardiovascular, immunology and rare diseases, as well as oncology and respiratory diseases.
